1. This is responsive to the response filed on March 17, 2006. Claims 48-67 are pending in this application.
2. The rejection of claims 48-67 under 35 U.S.C. 103(a) as being unpatentable over Meckley et al. (USPN 6,267, 628) in view of Fair et al (USPN 6,250,964), as stated in the Office action mailed December 15, 2005, is incorporated by reference.
3. Applicant's arguments filed on March 17, 2006 have been fully considered but they are not persuasive.

Applicant argues that neither Meckley nor Fair teaches or suggests each jack in the upper row is horizontally offset with respect to an adjacent jack in the lower row at least a distance of approximately a length of a jack. The examiner respectfully disagrees. Meckley specifically discloses a multi-level multi-port jack housing having jacks wherein the jacks are offset from one another (col. 14, lines 62-64) and suggests that the jacks are desirable to space or distance from one another as much as possible to reduce crosstalk between the jacks (col. 3, lines 56-61). Further, Meckley specifically refers to Fair reference to disclose a variation of offset configurations (col. 3, lines 48-52 of Meckley). Fair discloses in Figs. 1A and 1B and column 4, lines 32-36 that each jack in the upper row is horizontally offset with respect to an adjacent jack in the lower row.

Applicant further argues that there is no motivation or suggestion in the art to increase the offset distances between the adjacent jacks of Meckley or Fair. As pointed out in the previously paragraph, Meckley does clearly suggest that the jacks are desirable to space or distance from

one another as much as possible to reduce crosstalk between them. And further, applicant argues that the examiner's conclusion of obviousness is based on improper hindsight reasoning. It is pointed out that any judgment on obviousness is in a sense necessarily a reconstruction based on hindsight reasoning, but so long as it takes into account only knowledge which was within the level of ordinary skill in the art at the time the claimed invention was made and does not include knowledge gleaned only from applicant's disclosure, such a reconstruction is proper. In re McLaughlin 443 F.2d 1392, 1395, 170 USPQ 209, 212 (CCPA 1971).

Furthermore, it appears that applicant suggests the examiner is applying an "obvious to try" rationale in support of an obviousness rejection. It is pointed out that it is Meckley suggesting such an "obvious to try" to separate each of the jacks from one to the others at a desired distance to obtain an optimal crosstalk reduction, and the court in Ball Corp. (Fed. Cir. 1991) held "obvious to try" is proper if the reference does disclose or suggest such a motivation.

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
